

# Aaron Williams

## Full Stack Web Developer

aaronrwilliams4@gmail.com | (510) 285-7807 | Oakland, CA

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

---

### SKILLS

HTML | CSS | LESS | JavaScript | React | Redux | Node.js | Relational Databases: SQLite | Express | Authentication | Python | Flask | Unit Testing: Jest and React Testing Library | Agile Development | REST API | Github | JSON

---

### PROJECTS

#### [Get2It - Front End and Back End Developer](#)

[GitHub](#)

Get2It helps the users keep track of tasks they need to complete during the day.

HTML | CSS | JavaScript | React | Redux | Node | Jest | Git

- Designed "Categories" field for tasks requiring adjustments on the front end and the back end
- Built the ability to filter tasks by date or by category
- Created a Redux testing utility then used it for testing on the front end using Jest

#### [Developers Desk: Help Ticket - Front End Developer](#)

[GitHub](#)

Allows users to submit a help ticket for tech support and it also allows experts to respond to these help tickets.

HTML | CSS | JavaScript | React | Git

- Employed authentication tokens and protected routes for security
  - Constructed complete CRUD functionality for students and helpers by integrating API
  - Applied react-router-dom to create routes and links
-
